### **About ForexCoin and Forex**

Forexcoin is a decentralized cryptocurrency based on Ethereum. The coin will become the main means of payment in a number of our online projects, which will further form a technological ecosystem.

Forex is a portmanteau of foreign currency and exchange. Foreign exchange is the process of changing one currency into another currency for a variety of reasons, usually for commerce, trading, or tourism. According to a recent triennial report from the Bank for International Settlements (a global bank for national central banks), the average was more than \$5.1 trillion in daily forex trading volume. The launch of a site for the exchange of fiat money and cryptocurrency is also planned. FXC owners will be able to save up to 100% on paying currency exchange fees. We managed to achieve a positive dynamics of FXC due to the

partnership with online services that provide our customers with the opportunity to use our cryptocurrency for the transactions.

## FXC advantages

---

### Anonymity

To purchase and use FXC, you do not need to disclose your identity. We guarantee complete confidentiality of your data. In addition, the decentralized nature of the network eliminates the possibility of third-party intervention. Cryptocurrency is not controlled by central banks and official governments.

### Security

Our site is securely protected - you can be sure of the safety of coins on your balance. Fraud protection is provided by Ethereum smart contracts, which are used to carry out all transactions.

### Transparency

In our public channels, we promptly notify about all the news related to the project - be sure to subscribe in order not to miss anything important. You will always find information about the status of your balance, partner network, transaction history, and other information in your personal account.

### Real use

The foreign exchange market is a global decentralized or over-the-counter market for the trading of currencies. This market determines foreign exchange rates for every currency. It includes all aspects of buying, selling and exchanging currencies at current or determined prices. This confirms the viability and prospects of the coin and will positively affect the dynamics of the cryptocurrency exchange rate.
